Re: Site Abandonment, Primrose #2, S/015/037, Emery County, Utah

The Division has received no correspondence from the operator, of this site, since 1989. Since then the Division has sent 3 annual report queries and heard nothing.

The Minerals Program still has no formalized policy for listing a site as abandoned. Our last draft was submitted to Management October 7, 1992. I suggest that we go ahead with an informal policy during the interim that somewhat parallels what we have proposed.

I would suggest that we list this site as possibly abandoned (PAB) now. The site would have to be inspected before listing as full fledged abandoned.

I don't know that anymore letters to the operator would do much good since the address we have been using has expired.

H. + J.)
Have we a phone # to try & call? Perhaps we should attempt to get a directory listing from "directory assistance" before we give up on this operator. State or Federal? If state or Federal, have we contacted those agencies for possible address or phone updates? If all avenues are exhausted, I concur with your inspection w/ BLM proposal. TX. J.

probably next step to pursue.

Contacted directory asst in 80s - no listing - BLM knew nothing of this clear back in '91. Jg.
